

E-Cell, IIT Hyderabad's
E-SUMMIT'21
"A Pragmatic Advent"

E-Cell
IIT Hyderabad

E-Summit brings a series of talks and panel discussions from the best minds in business and entrepreneurship, from the top-tier leagues, and question the most critical issues. We conduct power talk sessions by some of the most esteemed and experienced personalities of the field- ranging from entrepreneurs to influencers. The sessions are interactive as well as entertaining.

R&D in India post-Covid:

New challenges means new scope of invention and adaptation. Is there a dilemma of halting the R&D activities or not, citing the reduced money flow? What will be the scenario for the Research and Development field for the new India?

Revitalisation of economy through startups:

India has recently seen a boom in the number of startups turning up every year. People are more and more interested in venturing out themselves. What does this mean for the Indian economy in the long run?

Curing Economic Infection through Small Scale Industries:

The pandemic has especially hit the MSME sector adversely. Despite that, through government intervention, we have had examples of industries which have thrived and flourished despite these tough times.

Foreign Market's Interest in India:

India has become a one-stop shop for all types of market - from a radical economic point of view to sports and entertainment. What is it in India that it has become the centrepiece of foreign market outlook? What is in store for India in future?

The uprise of the internet-based entertainment and gaming industry:

The lockdown saw an expected but unprecedented upsurge in the viewership on the OTT platforms and Internet streaming services - gaming, movies, vlogs, series were on everyone's list. How has the response to this been? Will this new market flow away with time, or is it here to stay?

Big sharks gaining the monopoly in recent market

New ventures are facing a great problem in establishing themselves, even on a small scale. Are the big established firms to the blame? Is it the lack of execution by the new companies? Is a collaborative approach the best solution to this?
